I crafted these scripts for Jenkins, but unfortunately, I couldn't finish them due to licensing limitations with Katalon. So below is the proof of my work,

cd "c:\Users\ritik\Katalon Studio\Final_Project_On_Cura_HealthCare"

git pull "https://github.com/smartinternz02/SI-GuidedProject-704869-1705064238.git"

cd "C:\Users\ritik\Katalon_Studio_Engine_Windows_64-9.2.0"

katalonc -noSplash -runMode=console -projectPath="C:\Users\ritik\Katalon Studio\Final_Project_On_Cura_HealthCare\Final_Project_On_Cura_HealthCare.prj" -retry=0 -testSuitePath="Test Suites/Cura_TestSuite_For_Test_Listeners/Cura_TestSuite_BookAppointment_005" -browserType="Chrome" -executionProfile="default" -apiKey="426130c9-55e5-443b-8315-da085299f90f" --config -proxy.auth.option=NO_PROXY -proxy.system.option=NO_PROXY -proxy.system.applyToDesiredCapabilities=true -webui.autoUpdateDrivers=true
